To Whom it May Concern:

SUBJECT: BONDING WITH ZILLA® TOP CLIP

The Zilla® Top Clip function is to attach panels to the Zilla® Phantom and Zilla® Rail systems creating a low electrical resistance connection between two panel frames and the Zilla® Rail or between two panel frames in any system. The electrical connection is achieved with four 304 stainless steel screws that pierce the PV module frame when the 5/16" stainless steel nut is torqued to 6 ft-lbs. The Zilla® Top Clip is ETL listed to UL 467 and approved for use.

Sincerely,

A handwritten signature in black ink that reads "Dave Kreutzman". The signature is fluid and cursive, with a stylized "D" and "K".

Dave Kreutzman, Chief Technical Officer
